

Good afternoon Rush City Families,

This message is to inform you that several schools in our region are having to shift to more restrictive scenarios and/or halt activities due to a resurgence of COVID-19 in their school communities. Today marks two months of consistent K-12 in-person learning. Activities are going strong and students are enjoying a “modified” normalcy that had certainly been long in coming. We have been very fortunate to have had no COVID-19 cases at school since we have returned.

Please do your part to help our community stay healthy and avoid COVID-19 infections or even outbreaks that would jeopardize our in-person learning scenario. We are so close to reaching a true turning point in this pandemic, and we need to keep up our prevention efforts for just a little while longer. Keep wearing masks, avoid groups, stay home when sick, and get vaccinated when it is your turn. It is our hope that with strong continued safety efforts, our students will be able to enjoy spring sports, activities, prom, and graduation. Thank you for your continued support of our students and our community!

Brent Stavig
Interim Superintendent
